

AMSTERDAM POST

Code: D-AMS-63 D-AMS-SR7

WHAT AMSTERDAM POST IS?

New, unique and original sign.

Its main function is guide vehicles in an indicated direction.

The shape of the pallet can be circular or triangular.

Amsterdam post contributes to a more elegant environment.

FEATURES

- Manufactured in polyethylene with great durability, available in yellow, orange (other colors upon request) and white for those with light.
- No maintenance required, easy to handle.
- UV-protection.
- Its easy installation requires... a fastening with 3 self tapping screws and extralarge plugs (not included) or can be movable.
- Reflective sheeting for a better visibility at night.
- The upper part can be circular or triangular.
- Option to include light supplied by solar or electrical power.

ELECTRIC POWER SYSTEM

- Its lighting improves visibility.
- The luminous system on the upper part has 180 high intensity LEDs with an opening angle of 120°, distributed strategically to provide light all over the surface.
- The lower lighting system includes a tube conformed by white LEDs in blue translucent finish of 18 W.
- Everything prepared for a 110-240 Volts power supply.

SOLAR LIGHTING SYSTEM

Conformed by a photovoltaic cell and a battery bank interconnected through a charge-investment adjustment that guarantees the functioning of a signaling point (01 Amsterdam + 04 Elegant bollards) with up to 08-10 hours with full charge under sun exposure.
