

DELINEATOR POST

Code: R-1145

WHAT'S A DELINEATOR POST?

Delineator Post for traffic with two reflective rings and a base that prevents tipping.

Used to indicate a situation of risk or delimit specific areas.

The main function of this item is prevent vehicles from invade prohibited zones, demarcate reserved areas; working as a safety road delineator in places like bike lanes, parking lot entrances or even to create pedestrian crossings.

Useful in highways, avenues, roads, routes, circuits and restricted zones, such as construction areas or road signaling.

The best of everything is that doesn't require maintenance, this can be flexible or fixed; with an empty base or filling with sand.

FEATURES

- Road delineator, used as a multipurpose safety element; ideal to demarcate areas.
- Perfect to create temporary circuits to guide traffic.
- Safe device for pedestrian; withstands shocks and impacts, recovering its shape.
- Manufactured in linear polyethylene.
- Great resistance to environment and extreme temperature changes.
- With UV-protection.
- Delineator post in orange color with white reflective rings for greater visibility or delineator post in black with amber reflective.
- Hexagonal base in black color, providing stability and resistance against wind.
- 2 high quality reflective rings to increase night visibility.
- 1 extra reflective sheeting on the top part for better reflection and option to tie message tape or chain.

DELINEATOR POST

Code: R-1145

MEASUREMENTS

Dimensions, and other measures are nominal and may vary by +/- 2%.

Manufactured in • Linear Polytehtylene

Color of the post • Orange or black

Measurements of the post • Diameter 4.1 in
• Height: 3.9 ft

Material of the base • Linear Polyethylene

Measurements of the base • Length 15.7 in
• Height 3.9 in
• Width 7.8 in per side

Color of the base • Black

Reflective (optional) • 2.19 in height rings in amber or white color and Ø 3.1 in circle

Weight: Empty • 3.571 lbs

Weight with Sand • 19.312 lbs
