

## LUMINOUS BULLDOG BARRIER

Code: BB-S70L

### FEATURES

- Barrier manufactured in high-molecular-weight-polyethylene, its body has 5 directional chevrons per side.
- Barrier can be filled with water or sand ballast; with lower bridge to allow the water flow or being handled by forklift.
- Line color is orange, other colors upon request.
- It includes reflective to improve visibility during nighttime (optional).
- Rebound bollard made of Poliflexy®, ductile material that doesn't damage vehicles.
- Reflective in white color for better light-reflection at night.
- 3 prismatic reflective rings with black fillet, increasing visibility during night.

### BOLLARD'S SOLAR POWER INTELLIGENT SYSTEM

- Solar cell
- 5 ultra-bright LEDs.
- 40,000 MCD, 18 mA and 40 mW low current.
- Body color: white
- LED color: amber, red or white
- In addition to its color and reflective straps that ensure visibility at night or with fog.

### WHAT'S A TRAFFIC BARRIER?

Barrier for road safety with the perfect complement, such as the defender 80 bollard, creating the perfect pair for road works or work zones at night.

One of a kind, versatile barrier that can confine in curve or linear way, easy to handle thanks to its exclusive assembly.

The main function is cordon off prohibited zones, that function as road delimiters for safety.

Useful to delimit, sign or cordon off, providing security to pedestrian and drivers; guiding traffic flow to a less risky place.
