

SOLAR FLASHLIGHT

Code: LS-11

WHAT'S A SOLAR FLASHLIGHT?

Solar flashlight is an efficient innovation in road signage, designed to guarantee safety in road works, repairs and emergencies of highways.

Thanks to the advanced technology and design, it transforms into an essential tool to alert about possible dangers in road.

Provides the best protection for workers, pedestrians and motorists, integrating ecologic efficiency and responsibility in a single product.

FEATURES

- Manufactured in MDPE with acrylic mica, which is resistant to shocks, impacts and adverse climate conditions.
- 7 high bright amber LEDs with flashing sequence, even in low visibility conditions.
- Power supply through solar energy, thanks to integrated photovoltaic cell. This features is completely independent of external energy sources, besides is ecological, reducing environmental impact.
- Long durability battery that ensure functioning even in low light conditions.
- Available in two versions:
 - Base to install in floor or on trafisits, ideal to sign work zones or detours.
 - With grip, allow its transportation or installation in traffic cones, offering flexibility in different situations.

MEASURES

Dimensions and other measures are nominal and may vary by + - 2 %.

Dimensions

- Length: 4.3 in
- Width: 2.7 in
- Height: 11.6 in
