

TRAFFIC DRUM / RUBBER BASE

Code: TSL-112

TRAFFIC DRUM

Security device, designed to maximize visibility in highways and work areas.

Manufactured in high quality orange polyethylene, offering durability and resistance to adverse climate conditions, including UV ray exposure. Option to include a maximum of 4 reflective rings, enhancing visibility.

It can be set individually or in group, ideal to use in highways, work zones, closed road and to delineate work areas.

Benefits:

The perfect solution to improve road safety and guarantee the protection in work areas.

Comply with the NOM-0086-SCT2-2023

FEATURES

- It helps to channelize circulation within vehicle flow, such as parking lots to guide transit or delineate specific zones.
- Manufactured in a single piece with top grip for an easy handling and movement, making easier the installation.
- With boreholes that allow to set outer lamps.
- Stackable, reducing transport and storage costs.
- Option to include detachable heavyweight base, to add stability and avoid tilts caused by wind.
- Natural and synthetic rubber base used to improve the durability, black color.
- Easy to clean, with resistance to liquids and solvents.
