

## LANE SEPARATOR BARRIER WITH POST

Code: B-150-C

### WHAT'S A LANE SEPARATOR BARRIER WITH POST?

Lane separator conformed by 3 pieces and a reboundable delineator post.

Its main feature is to guide or direct bike lane transit.

Mainly suggested on avenues or places where is intended to include a bike lane and protect users.

### FEATURES

- Assembled base manufactured in medium density polyethylene.
- With UV protection, withstand to impacts and has rolling resistance.
- Its lightweight allows an easy transport.
- With smooth surface, without cutting edges and with round borders, it doesn't cause damages to tires neither users.
- With a Male-Female assembly system, allowing an easy and safe installation, it also needs 6 boreholes for its installation.
- Great visibility at long distances, thanks to the reflective on both ends.
- It is suggested to place on rows or in sections.
- Easy to install or reposition with a minimum interruption or perfect for temporary detours, to create space between each piece, allowing the entry or exit of cyclists to the lane.
- Option to include a Delineator post 66 of poliflexy® or two block - reboundable delineator post, providing more confidence to the protection of the cyclists.
- Both delineator posts include reflective bands to increase their visibility.
