

BRIO 105 SOLAR DELINEATOR POST

Code: BBRIO-105SOLAR

21 v \varnothing 3/8" x 5.9 in
Hex Head Ultrafix Screw

\varnothing 0.7 in x 5.3 in
Extralarge Anchor

WHAT SOLAR POSTS ARE?

Road signage devices designed to delineate and mark specific areas for pedestrians and vehicles, avoiding cars invade restricted or dangerous zones and contributing to road safety.

Manufactured in highly resistant plastic to climate conditions, wearing, tearing and impacts, reboundable posts have the ability of recover shape after impact, being specially useful in parking lot entrances and controlled transit areas.

This device is set in rows, these create a clear visual barriers that avoid forbidden parking in sidewalks and protect restricted access areas, such as bike lanes, pedestrian crossings, loading and unloading zones.

Their versatile, functional design ensures order and safety in control of accesses, improving urban space organization and developing a safe environment for pedestrians.

FEATURES

- Resistant to impact of vehicles.
- Recovers its original shape after impact, withstand more than 5,000 run overs.
- Manufactured in highly resistant plastic, material that doesn't cause damage to vehicles.
- Withstand accidental run overs of up to 5 tons.
- Translucent white color.
- 2 prismatic reflective rings to increase its visibility during night.
- Easy to place or change its position.
- Safe anchoring to the floor through 4 screws, four 3/8" flat washers and 4 extra-large anchors (not included), providing greater stability.

SOLAR POWER SYSTEM

- Equipped with solar cell.
- 5 latest generation ultrabright LEDs.
- JVM 40,000 MCD, with low current of 18,000 mA and 40,000 mW.
- Colors: amber, red, green, blue or white.

| Total | <ul style="list-style-type: none"> • Height: 41.3 in • Base \varnothing 7.0 in • Top \varnothing 2.3 in |
| Reflective Tape | <ul style="list-style-type: none"> • Ring of 2.3 x 7.0 in |
| Color of Reflective Tape | <ul style="list-style-type: none"> • Amber or white |
| Weight | <ul style="list-style-type: none"> • 2.292 lbs |

ANCHORING

1. Mark the boreholes using a $\frac{3}{4}$ " drill bit for concrete, and the base of the post as a template.
2. Drill the designated area to a 7" depth, insert the anchors on the boreholes and place the delineator post.
3. Insert the $\frac{3}{8}$ " screws and flat washers, then tighten the 4 screws with the help of a $\frac{9}{16}$ " socket wrench. **DONE!**
