

## LANE SEPARATOR 81L

Code: CAN-81L

### WHAT'S A LANE SEPARATOR 81L?

Road device for special lane demarcation.

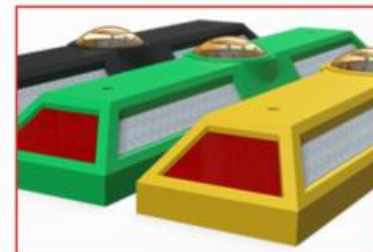

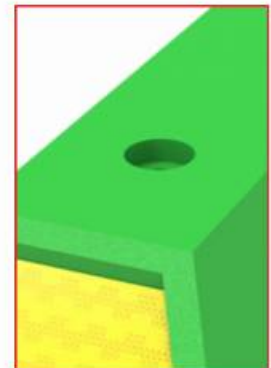

Ideal to delimit and confine bike lanes, guide or separate traffic.

It is used to suggest the pass of special lanes.

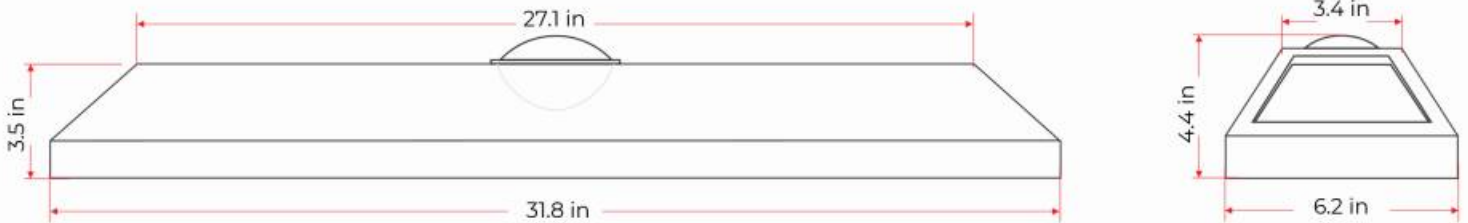

### FEATURES

- Manufactured in medium density polyethylene, in one piece with two boreholes to install.
- Black, green or yellow color.
- Round borders that provide greater security, preventing the damage of cars, bikes and pedestrians.
- Great durability that withstands the passage of heavy duty vehicles.
- Incredible visibility thanks to the reflective sheeting in both ends and one lateral side.
- Design that allows an easy stacking, saving transportation costs.
- In addition to increase and maximize its visibility has a solar button to be seen at longer distances.
- Flashing lighting system with 2 ultrabright LEDs in amber color, a durability of 100.000 hrs. and an intensity of 6500 mcd.
- Solar system powered by a photovoltaic cell, with a NiMH to install and re-position, if a change of place is necessary.
- It is installed with two drowned anchors + epoxy resin providing a greater fastening.
