

MINITOP 445

Code: MINITOP-445

WHAT'S A MINITOP 445?

This is a device to demarcate special lanes, perfect to delimit bike lanes or guide transit orderly, with option to include a Poliflexy® delineator post 66.

The Minitop can be used as a speed bump or as a lane separator.

Reduce the speed approximately up to 1.8-4.9 mph.

FEATURES

- Can be installed in any even surface.
- Perfect to reinforce STOP signs.
- Designed to be installed immediately.
- Resistant to any front or lateral impact, creating an almost unbreakable device.
- It doesn't crack, break or decompose.
- UV protection and resistant to humidity, oil and extreme temperatures.
- Male-female assembly.
- Its easy installation requires 5 3/8" 5.9" Hex Head Ultrafix Screws and 5 0.7" (diameter) x 5.5" length 14 Extralarge polyethylene anchors (not included).
- It doesn't require maintenance.

USED AS LANE SEPARATOR

- It also works as a lane separator with delineator post, this is the combination of two great products of our manufacturing:
- In first place, the Minitop 445 is manufactured in high density polyethylene.
- In second place, the delineator post 66 is manufactured in poliflexy, a material that mix softness and resistance to avoid the damage of vehicles in case of impact.
- It is a modern, appealing and functional product that provides security and a pleasant view to drivers.
- Ideal for bike lanes and counter flow lanes
