

MINITOP WITH POST

Code: MINITOP-H-65

WHAT'S A MINITOP?

Device used to demarcate special lanes, perfect to delimit and confine bike lanes or guide the traffic flow orderly; with option to include a Delineator post 66 of Poliflexy®.

The Minitop can be used as speed bump or lane separator.

Reduce the speed approximately up to 1.8-4.9 mph.

FEATURES

- Perfect to install in an even surface.
- Perfect to reinforce the STOP signs.
- This is designed to be installed immediately.
- Resistant to any front or lateral impact, creating an almost unbreakable device.
- It doesn't crack, break neither decompose.
- UV protection, resistant to humidity, oil and extreme temperatures.
- Male-female assembly.
- Its easy installation requires 5 3/8" x 5.9" of length hex head ultrafix screws and 5 0.70" of diameter x 5.5" of length (not included).
- It doesn't require maintenance.

AS LANE SEPARATOR

- It also works as a lane separator with delineator post, which is the combination of two great products of our manufacturing.
- In first place, the Minitop 445 is manufactured in high density polyethylene.
- In second place, the delineator post 66 is manufactured in Poliflexy®, material that merge softness and resistance to prevent the damage of vehicles in case of impact.
- Modern, appealing and functional product that provides safety, as a pleasant view to drivers.
- Ideal for bike and counter flow lanes.
