

## SOLAR KAYAK CHANNELIZER

Code: CA-YAK-700S

WE ARE ON...

THE NEXT LEVEL

### THE CHANNELIZER THAT DISSUADES WITHOUT HARMING

The traffic channelizer is designed to delineate lanes and channelize traffic flow to avoid vehicles invade separated lanes.

Mainly used for metrobus, bike lanes, public transport or contra-flow lanes.

Equipped with a synchronized flashing LED solar sphere to improve visibility for users.

The channelizer has multiple applications, it can be used to confine, delimit entrance or exit of forks, highways, toll booths and roads of high danger, areas of fog or low visibility.

### FEATURES

- Manufactured in a single piece of ABS, available in green or yellow color, with UV protection, it doesn't discolor or paint off.
- Crystal glass sphere lighted by latest generation ultra-bright LED's.
- High resistance to vehicle passage.
- Resistant to inclemency, it doesn't requires maintenance.
- Its body reliefs make a non-slip surface, with two lateral integrated borders to protect the sphere.
- Raised arrow indicates the mounting position in reference with the direction of traffic flow.
- Design with rounded edges, avoiding damage of vehicle or bike.
- 4 anchoring points, to guarantee its ground fastening.
- Includes 4 ABS bolts to anchor, located in horizontal holes on the lower part of the piece, optimizing transportation and storage.
- To install channelizers, take the bolts out of the holes and install them on the boreholes by tapping them with a hammer.

#### LIGHTING SYSTEM

- Colorless and tempered glass sphere with ultra-bright LEDs.
- LED Color: white or red.
- Solar panel and electronic system of high efficiency.
- JVM circuit to synchronize with wireless transmission that produces a flashing flash coordinating all the channelizers.

## MEASUREMENTS

Dimensions, and other measures are nominal and may vary by +/- 2%.

**Total:**

- Length: 27.5 in
- Width: 7.8 in
- Height: 2.8 in
- Height with sphere: 3.0 in
- Height with bolt: 5.1 in

**Body color:**

- Green or yellow

**Installation:** It is convenient to leave a 31 in and 3.2 ft separation between elements.
