

LUX CONE 75

Code: CN-75 LUX

LUX CONE ADVANTAGES

Thanks to LED intensification is possible to see at long distances, with option to be flashing or steady light, and synchronize them at the same time; if one fails, it doesn't affect sequence.

Poliflexy® cones have UV protection and last around 10 years without discoloration or break by sun ray degradation. These cones far outperform PVC ones.

Ideal to use on highways to prevent motorists from accidents, such as work zones or roads closed, also in parking lots; can be carry on trunks due are stackable and take up little space.

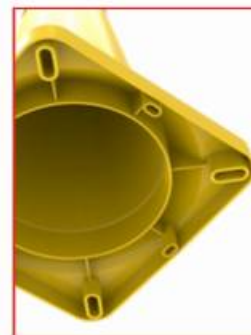

Mainly suggested on work zones, places with road repairs or where is required to sign a danger or detour.

Yellow cone with red light sample
