

## NEW CITY 390 STREET SIGN

Code: NOM-390N

### FEATURES

- The new design has a curved front to add any flexible coating with adhesion for signage in both sides.
- Lightweight body made of black RCB polymer, molded in one-piece with 2 integrated strips to install it.
- Vandal-proof street sign, with an easy installation. In addition, this can be used as an advertising spot.
- UV-protection; resistance to inclemency and temperature changes.
- It doesn't rust, creating a long-lasting element.
- 100 % recyclable.
- Line color: black.
- Easy installation through stainless steel strap.
- Can be installed in PTR, tubular or existent post.

### WHAT'S A STREET SIGN?

Modern, versatile and avant-garde Street Sign, all in one piece. It indicates the name of streets, type of road or demarcation where we are located, traffic flow direction, and in some cases the numbering of streets, avenues, et al.

Molded with materials specially developed to satisfy the maximum needs of resistance to external agents and the vandalism of public lighting.

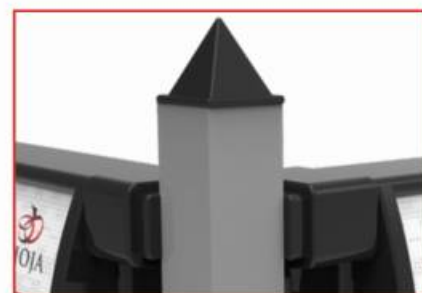

In addition, some of their sides can be perfect to add a QR code.

Integrated flanges

Stainless Steel Strap

Pyramidal finial
