NEW CITY 770 STREET SIGN

Code: NOM-770N

WHAT'S A STREET SIGN?

A luxury that doesn't cost much.

Signaling that indicate to users the name, route, demarcation where users are located, traffic flow, and in some cases the numbering of streets, avenues, and others.

It is placed in a proper post or preferably an existent one at the corner of the road intersections.

Curved front to add any flexible coating with adhesion for signage in both sides.

Ideal for naming streets or being used as advertising spots.

FEATURES

- Lightweight body made of black RCB polymer, designed in one-piece with two integrated flanges used to its installation.
- Durable material, rustproof.
- Resistance to inclemency and temperature changes, with UV-protection.
- 100 % recyclable.
- Resistant to vandalism and graffiti.
- Easy to install through stainless steel strap.
- It is suggested to install in tubular PTR post, this can be submerged, can be added a plate to drill, or can be installed in an existent post.
- Diamond or pyramid finial.
