

RECTANGULAR AND SQUARE REFLECTOR

Code: M-15 / M-16

DURABLE REFLECTION

The microprismatic technology of reflectors guarantee a unique night visibility.

Thanks to the advanced design, offer a high reflectivity, improving their recognition in low light conditions.

These are designed to be easily installed and adapt in different surfaces with round borders for greater safety and durability.

Ideal to set in sidewalks and posts, improving safety in diverse road and pedestrian infrastructures.

FEATURES

- Designed for a quick and adaptable installation to different surfaces.
- Round borders that provide greater safety and durability.
- These are affixed through rivets, offering a solid and permanent installation, without sealing borders, facilitating the mounting and maintenance.
- Highly resistant to impacts, strips preserve functionality and maintain photometric standards, ensuring constant visibility.
- Conserve their efficacy and safety even after years of use, providing a signage solution to long term.
- Manufactured in methacrylate with optical prisms inclined to 38° to improve performance.
- Line colors: amber and red.

RECTANGULAR AND SQUARE REFLECTOR

Code: M-15 / M-16

MEASUREMENTS

Dimensions and other measures are nominal and may vary by $\pm 2\%$.

M-15

- Length: 1.9 in
- Width: 0.27 in
- Height: 2.2 in

M-16

- Length: 3.9 in
- Width: 0.27 in
- Height: 2.2 in
