

SOLAR CHEVRON SIGN

Code: CHEVRON-S

WHAT'S A SOLAR CHEVRON?

This works with solar energy, guaranteeing autonomy and energy savings without cables, neither external electric connection.

Can operate individually or with other units. When many units are installed, these synchronize with others simultaneously, increasing visibility and efficacy.

Ideal for zones with fog, rain or other adverse climate conditions, ensuring a reliable and durable performance.

This device provides more than an effective and constant protection, but contribute to the efficient use of resources to use solar energy.

2 year warranty for hidden defects or manufacturing flaws.

FEATURES

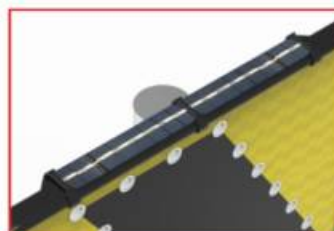

- Made of resistant materials and robust design to withstand vandalism attempts and external severe conditions.
- Lightweight body manufactured in black color polyethylene designed in a single piece.
- Resistance to inclemency and temperature changes, with UV protection.
- Long life span due doesn't rust.
- 100% recyclable.
- Stackable, reducing transport and storage costs.
- Mounted on a 2" x 2" reinforced Posteflex®, offering a fast installation and superior durability against vandal acts.
- Prismatic reflective background in yellow color with black vinyl arrow.
- Arrow to the right or left according to the direction of circulation.
- Its plastic material prevents thefts, due to its negligible resale value and specific use.

SOLAR LIGHTING SYSTEM

- Solar panel of 1.5 x 15 in
- 30 LED's in amber color with conical optics, optimizing the light expansion.
- 2 batteries of 15 V.
- JVM power supply electronic circuit that synchronizes the flashing of the arrows at the same time.
- Recharge during 6 hours under sunlight, and has a durability of 24 hours on flashing mode.

Chevron installed on right side, the side of the center lane divider

1.5 X 15.7 in photocell mounted on the top part of the signal

Chevron installed on left side, the shoulder divider side
