

REVERSIBLE LANE SIGN

Code: SÑ-REV

WHAT'S A REVERSIBLE LANE SIGN?

It's a lane normally enabled in urban zones according to the traffic needs. This can follow or not the traffic flow (they are not provisional lanes, but directional lanes), its purpose is to improve traffic flow.

In order to facilitate this reversible lane issue, we implemented a solar board with 5 main functions, according to their needs, **GO (green arrow)**, **STOP (red cross)**, **RIGHT EXIT (amber arrow)**, **LEFT EXIT (amber arrow)**, **PREVENTIVE (amber diamond)**.

The reversible lane is a lane 'urban version' enabled to go opposite to the traffic flow.

This lane type helps to reduce traffic (mainly used on highways during road maintenance, toll booths, et al) or to be used on a work area.

FEATURES

- The Reversible Lane Sign is composed by a square to indicate if the lane is enabled to use or no, and in which direction.
- Lightweight body made of black polyethylene designed in one piece.
- Resistance to temperature, adverse weather conditions and UV-rays.
- 100 % recyclable; reduced resale value and protection against theft due to plastic construction.
- Stackable, reducing transport and storage costs.
- Easy to Install, can be placed on bridge parapet with hook clamp, additional in one (SIDE-elevated) or drowned with PTR post, round post option.
- Single or double board option.

LIGHTING SYSTEM

- Innovative solar cell system mounted on the upper part of the board, secured with plastic staples, optimizing space and preventing vandalism. The battery pack gives greater comfort, due it is not necessary to use an additional pack, standing out at first glance, and providing up to 16 continuous hours without light.
- Latest generation, ultra-bright LED's in red, green and amber with conical optics to optimize light.
- JVM electronic power circuit to synchronize the flashing.

REVERSIBLE LANE SIGN

Code: SÑ-REV

MEASUREMENTS

Dimensions and other measures are nominal and may vary by + - 2%.

Total:

- Length: 3.3 ft
- Width: 3.1 in
- Height: 3.3 ft

Sign Dimensions:

- Length: 3.2 ft
- Height: 3.2 ft

Brightness:

- Latest generation ultra-bright LED's.

Color

- Red, green and amber.
