

GOLD AND SILVER FENCE Safety Fence

Code: MPO-OP-110 / MPO-OP-153

WHAT'S A SAFETY FENCE?

The safety fence has a 100% lightweight body in gold or silver color, perfect for works.

In case of road modifications, the fence works to sign the incident to motorists, in order to reduce their speed at the moment the fence is visible.

It also alerts pedestrians and guide them to a less risky road.

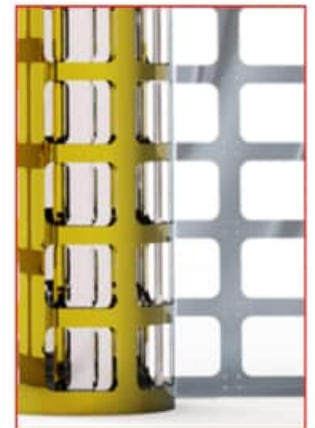

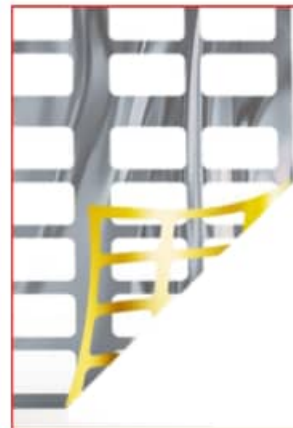

Useful device for barriers in: highways under construction, works, et al. Item that protects people when impeding the access to certain hazardous areas.

This fence has a lot of applications to guarantee safety and protection, thus its color can be recognized easily (gold and silver).

Thanks to its high visibility, this can be seen from a considered distance.

FEATURES

- Manufactured in polyethylene with two colors, these are gold and silver.
- Alerts to pedestrians and workers about a risk zone and guide them to a safe highway.
- Two heights: 5.01 ft and 3.6 ft.
- Environment resistant and UV-protection
- Easy to handle and install; is affordable too.
- It is recommended to use metal posts with a higher height of the fence, and set the posts firmly to the floor; so consider the post's total height including the part under the ground. The distance between the posts is considered according to the ground conditions.
