

SOLAR STREET SIGN 390

Code: NOM-390S

FEATURES

WHAT'S A STREET SIGN?

The street sign 390 is luminosity in all its splendor, with vandal-proof design and solar technology.

More than a street sign, a street decoration, an ornament with light that brings life to avenues.

It indicates to users the name, type of road, demarcation of location, traffic flow, and in some cases the address signs of streets, avenues, and others; regardless of the time of the day, as it is visible at all times.

It is placed in a proper post or preferably an existent one at the corner of the road intersections.

Ideal in strategical zones with pedestrian flow or meeting points.

Geo-location technology with QR-code for emergencies and safety (optional).

- **Street Sign** manufactured in lightweight body of white RCB polymer to allow the sunlight pass through, designed in one-piece with 2 integrated steel straps to install on the post.
- Curve front to add any flexible label with adhesion for signage in both sides, with a service life of 5 years.
- Resistance to inclemency and temperature changes, with UV-protection.
- Long lifespan, it doesn't rust.
- 100 % recyclable.
- Easy to install, (stainless steel strap).
- Tubular post or RHS (optional), finished in black color paint.
- Diamond or pyramidal finial.

ELECTRIC SYSTEM

- 3V, 1.65W; 1.1 x 11.8 in solar panel.
- Strip of 1.5 Watts, 12 latest generation ultra-bright SMT LEDs in white color.
- Aluminum support for LED and heat sink.
- 2 "AAA" batteries, of 1100 mA.
- JVM supply circuit.

Integrated slots

Lighted by LEDs

Stainless steel strip
