

REST BENCH

Code: BA-DE-2000L/BA-DE-2000M/BA-DE-2000P

Lateral supports of Rest Bench have a retro design with incorporated arm rests that provide the necessary structure and resistance for users to be comfortable to read, talk, wait for someone, or as the name mentions, take a rest.

The design adapts to any environment of public space, it's an element of urban furniture that contributes to improve the image of cities.

Benches are assembled with 2 lateral supports and a center support that hold the seat and back.

Seat and back can be made of:

- Wooden planks with marine polyurethane enamel.
- Plasti-wood profiles.
- 12-gauge steel sheet, can incorporate design or logo through laser cutting.

The quality and resistance of its materials allow to have an excellent performance for indoors and outdoors, these require a minimum maintenance.

Applications: Rest model benches are the best choice for parks and gardens with children areas, due parents can rest comfortably while children have fun.

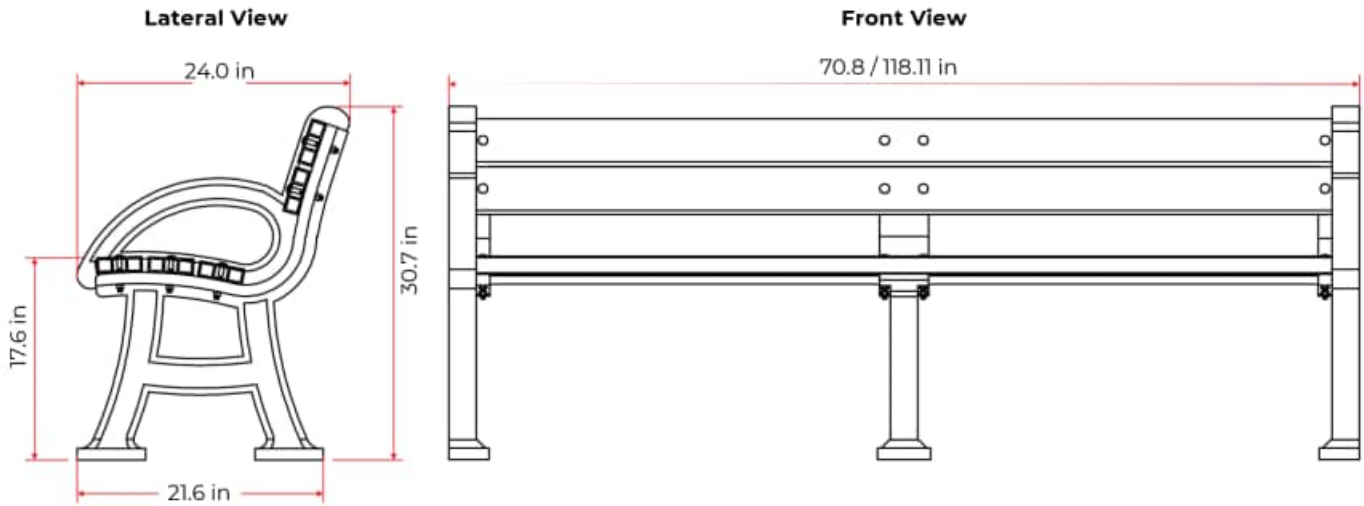

FEATURES

- Standard measures of 70.8 in and 118 in of length, can customize according to the customer needs and available space for its installation.
- Supports manufactured in 100% recycled MDPE that offers solid structure and an excellent bench stability.
- The supports of the bench include a base in a specially designed area for a safe anchoring to floor. This is achieved through "Ultra fix" screws with hex-head reinforced anchors of 3/8" x 5.9 in and "Extralarge" reinforced anchors of 3/4" x 5.5 in, manufactured with polypropylene.
- All the used materials comply with necessary specifications to withstand outdoors conditions in any climate type.
- The integrated armrests in lateral supports add an additional element of comfort to the bench design.
- The extruded wooden planks that make the seat and back are assembled to support of bench using nuts, flat and lock washers, everything in galvanized screws.
